WAYSBEANS

<https://ways-beans-three.vercel.app/>

WaysBean Built with React Typescript and Express Typescript, providing a fast and seamless online shopping experience. Customers can easily browse for products, add items to their cart, and securely complete the checkout process. The platform includes secure payment options

Frontend :

 **React JS**
 **Chakra UI**

Backend :

 **Express**
 **Prisma**

Tools :

 **Cloudinry**
 **Typescript**
 **Midtrans**

DUMB MERCH

<https://dumbmerch-frontend.vercel.app/>

Developed a dynamic e-commerce platform using React and Express, providing a fast and seamless online shopping experience. Customers can easily browse for products, add items to their cart, and securely complete the checkout process. The platform includes secure payment options and streamlined messaging for customer inquiries and complaints, which enhances both user satisfaction and merchant engagement

Frontend :

 **React JS**
 **Chakra UI**

Tools :

 **Cloudinary**
 **TypeScript**
 **Midtrans**

Backend :

 **Express**
 **Prisma**
 **PostgreSQL**

BOOKLIB

<https://booklib-production-9603.up.railway.app>

BookLib is a modern library management system built with Laravel, MySQL, Tailwind CSS, Composer, and Artisan. Designed to streamline borrowing activities, it allows users to browse available books, submit loan requests, and share feedback through ratings and comments. Admins can efficiently manage book inventories, user data, and monitor loan activity in real-time via an intuitive dashboard – ensuring a structured and organized library experience.

As a final project for the Dicoding Frontend Developer training, I developed a note-taking website. Similar to common note-taking applications, this website allows users to create new notes, delete existing ones, search for specific notes, and archive them. Each note consists of a title, creation date, and content. The website includes a form for adding new notes with built-in validation and utilizes local storage to save user data
